This website uses Frames, but (if you see this text), your browser (must be very old) does not seem to support them, or is not configured to use Frames. Fri, 07 Dec 2018 20:11:00 GMT Midley History of early Photography: - In infrared photography, the film or image sensor used is sensitive to infrared light. The part of the spectrum used is referred to as near-infrared to distinguish it from far-infrared, which is the domain of thermal imaging. Wavelengths used

for photography range from about 700 nm to about 900 nm. Film is usually sensitive to visible light too, so an infrared-passing filter is used; this lets ...
