The ocean is the source of life, and the sea area cover about 71% of the world's total oceans and land. Marine life has higher bioactivity and more functions compared with organisms on land, but are less explored and investigated. Dept. | NIT Silchar - Field electron emission (also known as field emission (FE) and electron field emission) is emission of electrons induced by an electrostatic field. The most common context is field emission from a solid surface into vacuum. However, field emission

can take place from solid or liquid surfaces, into vacuum, air, a fluid, or any non-conducting or weakly conducting dielectric. Thu, 29 Nov 2018 20:56:00 GMT Field electron emission - Wikipedia - Friction-stir welding (FSW) is a solid-state, hot-shear joining process, in which a rotating tool with a shoulder and terminating in a threaded pin, moves along the butting surfaces of two rigidly clamped plates placed on a backing plate as shown in Fig. 1. The shoulder makes firm contact with the top surface of the work-piece. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this. Sun, 09 Dec 2018 07:01:00 GMT Glossary of research economics - econterms - Self-healing materials are artificial or synthetically-created substances which have the built-in ability to automatically repair damage to themselves without any external diagnosis of the problem or human intervention. Generally, materials will

degrade over time due to fatigue, environmental conditions, or damage incurred during operation. Cracks and other types of damage on a microscopic ... Mn, used between 1.5-3 wt.% also stabilizes the austenite, is a ferrite solid solution strengthener and retards ferrite formation.
