I often feel that the explanations given in Algorithms are much harder to grasp than those in the CLRS book. Partly, this is due to fewer pages devoted to each concept, and fewer concepts overall (leading to a spottier understanding of the field and the relations between concepts.) Sun, 09 Dec 2018 03:55:00 GMT Algorithms: Sanjoy Dasgupta Algorithms, Christos H ... - Machine learning (ML) is the study of algorithms and mathematical models that computer systems use to progressively improve their performance on a specific task. Machine learning algorithms build a mathematical model of sample data, known as "training data", in order to make predictions or decisions without being explicitly programmed to perform the task. Sat, 08 Dec 2018 01:19:00 GMT Machine learning - Wikipedia - In a much cited survey on intrusion detection systems, Axelsson put forth a generalized model of a typical intrusion detection system. Fig. 1 depicts such a system where solid arrows indicate data/control flow while dotted arrows indicate a response to intrusive activity. According to Axelsson, the generic

The act of simulating something first requires that a model be developed; this model represents the key characteristics, behaviors and functions of the selected physical or abstract system or process. The model represents the system itself, whereas the simulation represents the operation of the system over time.
