Petty, editors Mon, 03 Dec 2018 09:31:00 GMT aquatic ecosystem restoration foundation -

Aquatic and semiaquatic mammals are a diverse group of mammals that dwell partly or entirely in bodies of water. They include the various marine mammals who dwell in oceans, as well as various freshwater species, such as the European otter. They are not a taxon and are not unified by any distinct biological grouping, but rather their dependence on and integral relation to aquatic ecosystems. Wed, 05 Dec 2018 06:01:00 GMT Aquatic mammal - Wikipedia - There is/was a problem with your internet connection. Please note that some features may not function properly.
