DESCRIPTION.

Architecture of a DBI
Application; Notation and
Conventions DBI -
Database independent
interface for Perl -
metacpan.org - A database
is an organized collection of
data, generally stored and
accessed electronically
from a computer
system. Where databases are
more complex they are
often developed using
formal design and modeling
techniques.. The database
management system
(DBMS) is the software that
interacts with end users,
applications, and the
database itself to capture
and analyze the data.
