

by alexander levitov
critical care pdf - Mantle
length (ML) is the standard
size measure for coleoid
cephalopods (shell diameter
being more common for
nautilus) and is almost
universally reported in the
scientific literature. The
mantle is the cephalopod's
"body", lying posterior to
the head and enclosing the
visceral mass and mantle
cavity, the latter being used
for locomotion by jet
propulsion. Cephalopod
