Wed, 05 Dec 2018 13:54:00 GMT conformational analysis conformational analysis conformation pdf - Conformational isomers exist in a dynamic equilibrium, where the relative free energies of isomers determines the population of each isomer and the energy barrier of rotation determines the rate of interconversion between isomers:  $K = \frac{e^{-\Delta G^\ddagger / RT}}{e^{-\Delta G^\ddagger / RT}}$  where K is the equilibrium constant,  $\Delta G^\ddagger$  is the difference in standard free energy between the two conformers in kcal/mol, R is the universal gas ... Fri, 07 Dec 2018 12:47:00 GMT Conformational isomerism - Wikipedia - Single-strand conformation polymorphism (SSCP), or single-strand chain polymorphism, is defined as a conformational difference of single-stranded nucleotide sequences of identical length as induced by differences in the sequences under certain experimental conditions. This property allows sequences to be distinguished by means of gel electrophoresis, which separates fragments according to ...
