A vector containing foreign DNA is termed recombinant DNA. The four

major types of vectors are plasmids, viral vectors, cosmids, and artificial chromosomes. Tue, 04 Dec 2018 23:56:00 GMT Vector (molecular biology) - Wikipedia - Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...
