

renal physiology

Sat, 15 Dec 2018 15:15:00 GMT renal physiology pdf - Renal physiology (Latin *renes*, "kidneys") is the study of the physiology of the kidney. This encompasses all functions of the kidney, including maintenance of acid-base balance; regulation of fluid balance; regulation of sodium, potassium, and other electrolytes; clearance of toxins; absorption of glucose, amino acids, and other small molecules; regulation of blood pressure; production of ...

Sun, 16 Dec 2018 03:25:00 GMT Renal physiology - Wikipedia - Sign up to receive ATOTW weekly - email worldanaesthesia@mac.com! ATOTW 274, Renal Physiology - Part 2 12/11/2012 Page 2 of 11 INTRODUCTION Fri, 14 Dec 2018 04:46:00 GMT 274 Renal Physiology - Part 2 - FRCA - Renal compensation is a mechanism by which the kidneys can regulate the plasma pH. It is slower than respiratory compensation, but has a greater ability to restore normal values. In respiratory acidosis, the kidney produces and excretes ammonium (NH_4^+) and monophosphate, generating bicarbonate in the process while clearing acid. In respiratory alkalosis, less bicarbonate (HCO_3^-) is ...
