GMT resonator guitar

wikipedia pdf - A resonator

is a device or system that

exhibits resonance or

resonant behavior, that is, it

naturally oscillates at some

frequencies, called its

resonant frequencies, with

greater amplitude than at

others. The oscillations in a

resonator can be either

electromagnetic or

mechanical (including

acoustic).Resonators are

used to either generate

waves of specific

frequencies or to select

specific ... Resonator -

Wikipedia - The guitar is a

fretted musical instrument

that usually has six strings.

It is typically played with

both hands by strumming or

plucking the strings with

either a guitar pick or the

finger(s)/fingernails of one

hand, while simultaneously

fretting (pressing the strings

against the frets) with the

fingers of the other hand.

The sound of the vibrating

strings is projected either

acoustically, by ... Guitar -
