

spectrochemical analysis and ingle and study guide

Mon, 03 Dec 2018 20:15:00

GMT spectrochemical analysis and ingle and pdf - Absorption spectroscopy refers to spectroscopic techniques that measure the absorption of radiation, as a function of frequency or wavelength, due to its interaction with a sample. The sample absorbs energy, i.e., photons, from the radiating field. The intensity of the absorption varies as a function of frequency, and this variation is the absorption spectrum.
